Birds of East Asia: China, Taiwan, Korea, Japan, and ...

The birds of Asia are diverse. The avifauna of Asia includes a total of 3,781 species. The taxonomy of this list adheres to James Clements' Birds of the World: A Checklist, 2019 edition. Taxonomic changes are ongoing. As more research is gathered from studies of distribution, behaviour, and DNA, the order and number of families and species may change.

East Asian-Australasian Flyway - Wikipedia

The endangered bird is a seldom-seen resident of far-east Asia, but several hundred pairs are thought to survive in the species' epicenter: the old-growth forests of Primorye, a remote region of Russia that borders the Sea of Japan to the east and China and North Korea to its south. There, in 2000, conservationist and writer Jonathan C ...
