## ~~Aplikasi Good Manufacturing Practices Sanitation Standard~~

Good Manufacturing Practice in Cleaning and Sanitation Cleaning and sanitation of premises and equipment are essential to efforts to prevent contamination of product, and they need to be done in compliance with Good Manufacturing Practice (GMP) regulatory requirements.

## ~~Good Manufacturing Practice in Cleaning and Sanitation~~

Sanitation is a critical and a regular part of F&B manufacturing. It shouldn't be viewed as a disruption, but as an important part of the operation. By making a concerted effort to achieve a balance between efficiency and effectiveness of the sanitation process, you can ensure safe product, reduce risk and pose minimal disruption to operations.

Good manufacturing practices are the practices required in order to conform to the guidelines recommended by agencies that control the authorization and licensing of the manufacture and sale of food and beverages, cosmetics, pharmaceutical products, dietary supplements, and medical devices. These guidelines provide minimum requirements that a manufacturer must meet to assure that their products are consistently high in quality, from batch to batch, for their intended use. The rules that govern e
