Simplified approach to costing theory adapts a fresh and novel approach to the study of the subject costing for the CA-IPCC/pcc keeping in view the specific requirements of candidates appearing for the CA exams. While the "CA course" By itself is termed to be a challenging course, even to the brilliant students, The subject costing certainly daunting with aggressive teeth to create allergy before any student desirous of taking up CA exams both at IPCC and final level. It is true in the case of any subject, The concepts and theory are the fulcrum of the subject and the rest all is only a superstructure based on the pedestal of such strong conceptual framework. At this juncture a need was felt to have a book in a simple language which an average student can understand and a brilliant can brush up his knowledge faster. I hope this is the objective and conviction behind the birth of this tiny baby simplified approach to costing theory!!.
