This Independence Day edition of *The World is Flat 3.0* includes an an exclusive preview of *That Used to Be Us: How America Fell Behind in the World It Invented and How We Can Come Back*, by Thomas L. Friedman and Michael Mandelbaum, on sale September 5th, 2011. A New Edition of the Phenomenal #1 Bestseller "One mark of a great book is that it makes you see things in a new way, and Mr. Friedman certainly succeeds in that goal," the Nobel laureate Joseph E. Stiglitz wrote in *The New York Times* reviewing *The World Is Flat* in 2005. In this new edition, Thomas L. Friedman includes fresh stories and insights to help us understand the flattening of the world. Weaving new information into his overall thesis, and answering the questions he has been most frequently asked by parents across the country, this third edition also includes two new chapters--on how to be a political activist and social entrepreneur in a flat world; and on the more troubling question of how to manage our reputations and privacy in a world where we are all becoming publishers and public figures. *The World Is Flat 3.0* is an essential update on

globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks--environmental, social, and political, powerfully illuminated by the Pulitzer Prize--winning author of *The Lexus and the Olive Tree*.

DIY science projects using old tech to create new zombie tech--an eco-friendly, fantastic way to learn about today's technology. We all have a drawer or closet full of old discarded tech just sitting around, gathering dust. Memories of a bygone technological era that have been replaced by newer, shiner, smarter devices. What can you do with them? Most of us don't even know how to properly dispose of them. If only there was a way to save them from their untimely fate. Well empty out that drawer and grab a screwdriver because the time has come to bring these old devices back from the grave! Old technology may no longer be useful, but it isn't useless. Hidden inside often-discarded devices is a treasure trove of motors, magnets, screens, and other parts just waiting for a chance to be upcycled! And this type of "upcycling" doesn't mean turning an old CD into a coaster, it means something a little more hardcore, like . . . .

- How to make a great Wi-Fi security camera with an old cell phone
- How to make a basic 3D printer out of old computer disk drives
- What can be made with the rare-earth magnets inside old hard drives or the reusable LCD screens in old phones
- And much more

The legendary Silicon Valley entrepreneur examines how both business and government organizations can harness the power of disruptive technologies. Tom Siebel, the billionaire technologist and founder of Siebel Systems, discusses how four technologies--elastic cloud computing, big data, artificial intelligence, and the internet of things--are fundamentally changing how business and government will operate in the 21st century. While this profound and fast-moving transformation can appear daunting to some, Siebel shows how organizations can not only survive, but thrive in the new digital landscape. In this authoritative yet accessible book, Siebel guides readers through the technologies driving digital transformation, and demonstrates how they can strategically exploit their powerful capabilities. He shows how leading enterprises such as Enel, 3M, Royal Dutch Shell, the U.S. Department of Defense, and others are applying AI and IoT with stunning results.

In this collection of his writings, Pope Benedict XVI speak to the important relationships between the environment, Catholic social teaching, and theology. During his papacy, Pope Benedict XVI repeatedly drew attention to the environment. He spoke of preserving it, such as his address concerning the Amazon

rainforest and his letter regarding the Arctic, and of distributing its vital resources—such as water—more equitably. Benedict led by example when the Vatican became the first carbon-neutral country in the world. This book collects Benedict's many audiences, addresses, letters, and homilies on a wide range of topics dealing with the world about us. The major themes and connections he explores include creation and the natural world; the environment, science, and technology; and hunger, poverty, and the earth's resources. In these pages, Benedict insists that if we truly desire peace, we must consciously nurture all of creation. He speaks in favor of alternative energy while speaking out against the spread of nuclear weapons and threats to biodiversity. He urges sustainable development, equitable distribution of food and water, and an end to hunger. In summation, Benedict argues that our love of God should cause us to protect the environment, and that in turn, our heightened appreciation of the natural world will draw us closer to God.
