~~Daikin Altherma indoor unit
Daikin Altherma 3 H HT is an investment in comfort and energy savings. This air-to-water heat pump delivers heating, cooling and instant hot water—and uses less energy to do it. This system is ideal for homeowners who want to upgrade their boiler or traditional heating system to a greener and more cost-effective solution.~~

~~Daikin Altherma 3 H HT | Daikin
Daikin's Altherma air-to-water low temperature heat pumps are the optimal choice for homes of all types, including new homes or builds. When combined with underfloor heating or low temperature radiators, the configuration requires less energy to heat your home.~~

~~Air to water low temperature heat pumps | Daikin
The unit is the indoor part of the air to water EMRQ heat pump. The unit is designed for ?oor standing indoor installation and used for heating applications. The unit can be combined with space heating radiators (?eld supply) and with an EKHTS* domestic hot water tank (option).~~

~~Daikin Altherma indoor unit
Daikin Altherma high temperature's compact design requires minimal installation space and integrates seamlessly with your existing piping and radiators. This way, you can enjoy the energy efficiency of a heat pump without having to replace your entire system. Powered by renewable energy~~

~~Air to water high temperature heat pumps | Daikin
Equipped with cascade technology, Daikin Altherma Flex type is the ideal solution for buildings where there is a high demand for hot water. By using renewable energy from the heat pump and recovering heat from the cooling operation, the system can heat the hot water tank up to 75°C without using an electric heater.~~

~~Daikin Altherma flex type | Daikin
A flexible solution Daikin Altherma is a modular and flexible system capable of meeting all your heating needs, with or without sanitary hot water, and being seamlessly integrated with the old components of your heating system. Heating and sanitary hot water The Daikin Altherma HT solution can also produce sanitary hot water.~~

~~Daikin Altherma HT | Daikin~~

The Daikin Altherma heat pump system extracts thermal energy (at ambient temperature) from the air and upgrades the heat to a higher temperature releasing it into the water running through your central heating system. With radiators, under floor heating systems and fan coil units the heat is distributed around the system.

A dark and twisted psychological tale, which Kirkus Reviews called "captivating to the very end" in a starred review—perfect for fans of I Hunt Killers and Gone Girl. Max Cantrell has never been a big fan of the truth, so when the opportunity arises to sell forged permission slips and cover stories to his classmates, it sounds like a good way to make a little money. So with the help of his friend Preston and his girlfriend, Parvati, Max starts Liars, Inc. Suddenly everybody needs something, and the cash starts pouring in. Who knew lying could be so lucrative? When Preston wants his own cover story to go visit a girl he met online, Max doesn't think twice about it. But then Preston never comes home. And the evidence starts to pile up—terrifying clues that lead to Preston's body. Terrifying clues that point to Max as the killer...

Get This Great Visual Guide to Mushrooms! Hundreds of full-color photographs with easy-to-understand text make this a perfect visual guide. Learn about more than 400 species of common wild mushrooms found in the Upper Midwestern states of Illinois, Indiana, Iowa, Michigan, Minnesota, North Dakota, South Dakota, and Wisconsin. The species (from Morel Mushrooms to Shelf Mushrooms) are organized by shape,

then by color, so you can identify them by their visual characteristics. Plus, with the Top Edibles and Top Toxics sections, you'll begin to learn which are the edible wild mushrooms. The information in the book, written by expert foragers Teresa Marrone and Kathy Yerich, is accessible to beginners but useful for even experienced mushroom seekers.

In words that are profound, often humorous, but always biblical, Ed Young draws from decades of counseling couples to provide ten commandments for a lifelong marriage that sizzles. God wants your marriage to be nothing short of incredible. And it could all begin with this amazing book.

New York Times and USA Today Best-selling paranormal romance author Felicity Heaton presents *Prophecy: Child of Light* (Vampires Realm Romance Series Book 1) A vampire unlike any other, *Prophecy* lives life in the dark until the night she encounters a sensual dark-haired vampire who is both her enemy and the man who will change her world forever. A loyal hunter for the Aureora bloodline, Valentine is bound by duty to report her as the vampire of the prophecy, but he cannot shake the vision of them he saw in her blood. Torn between duty and desire, and determined to uncover the truth, Valentine goes against his order to execute her and kidnaps the beautiful Caelestis female instead. Thrust into a terrifying world where the seven bloodlines and the Law Keepers are hunting her and her only hope for survival is Valentine, *Prophecy* battles her temptation to surrender to her illicit attraction to him and fights for her future. When she discovers her extraordinary destiny, will she be strong enough to embrace it and stop a deadly war from igniting? The first novel in the Vampires Realm series and the best selling *Prophecy* Trilogy, *Prophecy: Child of Light*, is part one in an epic tale of forbidden love that is sure to capture your heart and leave you craving more. Books in the Vampires Realm Romance Series Book 1: *Prophecy: Child of Light* Book 2: *Prophecy: Caelestis* and Aureora Book 3: *Dark Moon Rising* Book 3.1: *Spellbound* Book 3.5: *Reunion* Book 4: *Seventh Circle* Book 5: *Winter's Kiss* Book 6: *Hunter's Moon* Book 7: *Masquerade* Book 8: *Hunger*

For close to 20 years, "Industrial Engineering and Production Management" has been a successful text for students of Mechanical, Production and Industrial Engineering while also being equally helpful for students of other courses including Management. Divided in 5 parts and 52 chapters, the text combines theory with examples to provide in-depth coverage of the subject.

With intense competition for top management jobs and increased pressure on organizations to select the best candidates, more and more firms are now using challenging psychometric tests as part of their recruitment and assessment procedures. Also used to identify management potential in existing staff, tests are increasingly used to select the weakest employees when job cuts beckon. *Management Level Psychometric Assessments* offers more types of assessment than any other management testing book. Ideal for managers applying for supervisory roles or jobs on the board, for promotions as well as new employment, it includes tests on quantitative reasoning, currency conversion, verbal reasoning, decision analysis, situational awareness and visual estimation. Along with detailed answers and explanations, it places particular emphasis on getting you test-ready, with advice on the presentation part of your assessment and crucial information on which tests you are most likely to face for your industry. *Management Level Psychometric Assessments* is an invaluable resource providing all the practice you need to pass those tests and succeed against the competition.

A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques This second installment in the *Making Sense of Data* series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, *Making Sense of Data II* addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.makingsenseofdata.com) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traceist™ software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, *Making Sense of Data II* is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could help their organization.

A guide for parents, clinicians, and policy makers connects everyday moments and relationships in a child's life with their developing sense of values and meaning, demonstrating how children can be best positioned to become morally strong adults through an identification with loving caregivers. Reprint.

Fifteen topic-based units cover a wide range of business situations and the course provides frequent opportunity for discussion and thorough vocabulary development.
