Since the 1660s, the Seminary of Montreal -- a French, male religious community -- had been an integral part of the merchant, seigneurial, and clerical elite that dominated Montreal. Its significance in pre-industrial society was strengthened by its role as seigneur of Montreal Island and titular parish priest. The Seminary survived the British conquest, but came under increasing attack in the early nineteenth century from industrial producers and large capitalists landlords who resented the Seminary's seigneurial expropriations. By the 1830s, anticlerical elements in the peasantry and other popular classes had joined in the attack.

The World Is No Longer Flat Culo is an art, fashion, and pop-culture movement that defies all national, cultural, and linguistic boundaries. No matter if you were raised to call it derriere, tush, rear end, or booty, culo is the new epicenter of female sexuality, desire, and empowerment. Over the past decade, some of the world's most celebrated women have subtly shifted our long-held ideals of physical perfection toward a shape that is more authentic and bold. While culo has long been venerated in certain cultures, it is now becoming the object of worldwide mainstream admiration. This emerging global love affair with culo is as much about the blending of African, Latin, European, and Asian beauty as it is about celebrating the female form's most coveted asset. Culo by Mazzucco pays tribute to this phenomenon through a singular artistic vision. In more than 200 photographs and artworks created on location around the world, a diverse group of women--some already legendary, some about to become so--embody the spirit of culo and the start of a new era of beauty.

dogs, monkeys, and pheasants—all have shared spotlights and tabloid headlines with celebrities such as Sharon Stone, Thomas Edison, and David Hasselhoff. Millet hilariously tweaks these unholy communions to run a stake through the heart of our fascination with famous people and pop culture in a wildly inventive collection of stories that “evoke the spectrum of human feeling and also its limits” (Publishers Weekly, Starred Review). While in so much fiction animals exist as symbols of good and evil or as author stand-ins, they represent nothing but themselves in Millet's ruthlessly lucid prose. Implacable in their actions, the animals in Millet's spiraling fictional riffs and flounces show up their humans as bloated with foolishness yet curiously vulnerable, as in a tour-de-force, Kabbalah-infused interior monologue by Madonna after she shoots a pheasant on her Scottish estate. Millet treads newly imaginative territory with these charismatic tales. “These incredibly crafted stories, with their rare intelligence, humor, and empathy, describe the furious collision of nature and science, man and animal, everyday citizen and celebrity, fact and fiction. Lydia Millet's writing sparkles with urgent brilliance.” —Joe Meno

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added — On-board diagnostics and Oscilloscope diagnostics — and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

significant other, Mallory, a young, attractive woman with a bright future. Upon beginning a new profession, Mallory was suddenly struck down by unexplainable happenings: mind control, surveillance, stalking, and rape. Hall and others sacrificed themselves and their careers to bring her nightmare to an end. What happened to Mallory and what is happening to countless others? Hall's supposition is that we are faced with a type of terrorism that is unseen but just as deadly. Our government satellite surveillance systems are a new way for criminals to gain possession not only of our financial lives, but our most precious resource: Our minds. What can we do and who are these individuals who are trying to control the way we think, feel, act and what we do?
