Anthony Unwin's Graphical Data Analysis with R (CRC Press 2015) is a very good read that thoroughly discusses the process and principles behind plots of the first kind while offering considerable guidance about producing those of the second kind. In 14 chapters that extend to nearly 300 pages, Unwin makes superb use of the R language to develop the principles of Graphical Data Analysis (GDA) while demonstrating the interplay of plot making and basic statistical inference that together make ...
