voices which expand established understandings of autoethnography as a critical, creative methodology. The book centres around the traditional practice of ' wayfinding ' as a Pacific indigenous way of being and knowing, and this volume manifests traditional knowledges, genealogies, and intercultural activist voices through critical autoethnography. The chapters in the collection reflect critical autoethnographic journeys that explore key issues such as space/place belonging, decolonizing the academy, institutional racism, neoliberalism, gender inequity, activism, and education reform. This book will be a valuable teaching and research resource for researchers and students in a wide range of disciplines and contexts. For those interested in expanding their cultural, personal, and scholarly knowledge of the global south, this volume foregrounds the vast array of traditional knowledges and the

ways in which they are changing academic spaces and knowledge creation through braiding old and new. This volume is unique and timely in its ability to highlight the ways in which indigenous and allied voices from the diverse global south demonstrate the ways in which the onto-epistemologies of diverse cultures, and the work of critical autoethnography, function as parallel, and mutually informing, projects.
