Delay can bring a lead guitar to life, giving it the 3D width and depth that a mono recording inevitably lacks. It can be difficult to find the right balance, though: too little and the guitar remains flat and one-dimensional, while too much clogs the mix up, clouds the details of the solo and just sounds a bit amateurish.

Once you completely set up and get a raw sound you like, the real fun begins. Be warned, getting the right take can be a long and arduous process. Wrong notes, sloppy technique, accidental sneezes, and children playing outside can quickly ruin a take. Before we get into reducing external factors, I have one major piece of advice.
