The 4G54, or G54B, engine is also known as the Mitsubishi Astron engine. Production on this engine began in 1972. With a chain-driven single overhead camshaft, or SOHC, and eight valves, this engine provides plenty of torque for vehicles. Some features of this engine include heads with additional jet valves to improve emissions and a Hitachi two-barrel carburetor with a vacuum-operated progressive secondary in addition to hemispherical cylinder heads.
