The IQ is a measurement of your intelligence and is expressed in a number. A person's IQ can be calculated by having the person take an intelligence test. The average IQ is 100. If you achieve a score higher than 100, you are smarter than the average person, and a lower score means you are (somewhat) less smart.

During the test, you must read and respond to a total of 38 true/false questions. The test is timed, and the average test taker completes the test in about thirteen minutes. Completing the test in less than thirteen minutes will raise your score. Taking longer will lower your score.

Take the Test - IQ Test

IQ, or intelligence quotient, is a number derived from a standardized intelligence test. On the original IQ tests, scores were calculated by dividing the individual's mental age by his or her chronological age and then multiplying that number by 100. So, a child with a mental age of 15 and a chronological age of 10 would have an IQ of 150.
